## TS-SR-48 Bi-Directional, Stainless Steel LED Road Stud

### General Description

Our TS-SR-48 stainless steel road stud features a durable, low maintenance design with outstanding visibility during the day and at night.

The TS-SR-48 is typically used in crosswalk applications, but it also can be used to mark school zones and rail-road crossings, lane control for bridges and tunnels, wrong way warning, and toll booth or toll way lead-on applications.

All In-Roadway Warning Lighting System components are available from TSC. A typical installation would include a set of road studs, a control system, one or more activation devices such as a pedestrian push button station, and flashing LED crossing signs.

### Features

- Robust construction, suitable for harsh conditions.
- Snowplow resistant.
- Outstanding visibility during the day and at night.
- Suitable for applications in crosswalks, school zones, bridges and tunnels.
- Only .33" (8.5mm) above road surface.
- Connect multiple road studs in series circuit.
- Low maintenance, 100% waterproof.
- Easy replacement: base (fixed in the pavement), main body (removable).
- LEDs protected by polycarbonate window.
- Up to .62 mile (1 km) visibility distance due to high intensity LEDs.
- Optional: use different LED colors in each window.

## TS-SR-48 Bi-Directional, Stainless Steel LED Road Stud

**Dimensions (mm)**

**SR-SFT4 Installation Accessory**

### Installation Procedure

Personal protective equipment must be worn during installation process.

- 1** After deciding the location where the stud will be installed, drill a hole having a minimum diameter of 6.5" (165mm) and 3.94" (100mm) deep.
- 2** Using a disk cutter, open a connection between the holes with .59" (15mm) width and 2.36" (60mm) depth.
- 3** Brush any debris or dust from the hole resulting from drilling.
- 4** Dry the hole with a blowtorch to remove any moisture that may compromise the adhesion and effectiveness of the grout.
- 5** Add a SR-SFT4 installation accessory to each stud. The accessory will help to align and keep the road stud in place during the grout drying time. This accessory will be removed at the end of the installation.
- 6** Pour ±5.5 lb. (±2.5 kg) of ULTRAFLOW 4000/8 grout in the hole and insert the stud checking that the LEDs are facing the correct direction. Remove any excess grout.
- 7** The grout drying time may change depending on weather conditions. Consult the grout data sheet for more information. After the grout has dried, the top part of the SR-SFT4 accessory should be broken and removed.

**Changing or not completing the described installation process can result in suspension of warranty.**
