

18" STOP/SLOW LED Handheld Paddle

Canada P/N: PA-22212

General Description

This dual-sided paddle is ideal in regions of Canada that require a fluorescent yellow for construction zones, utility work, and school crossings. With dual faces and an internal ball switch function for automatic on/off control, it's perfect for efficient traffic management in lowlight or high-traffic areas.

Applications

- School crossings
- Parking lot management
- Traffic control
- Accident redirection
- Work zone safety
- Event management

Features

- Red "STOP" face with white LEDs
- Yellow "SLOW" face with white LEDs
- Lightweight and durable design
- Foam grip handle and wrist strap
- Rechargeable battery with lasting power
- Best seen in low-light or nighttime conditions
- x1 On/Off button per side
- Includes: x1 LED Paddle, x1 Wrist Strap, x1 Battery, and x1 Charger

Ball Switch Explained

This paddle comes equipped with a ball switch function- the LEDs will turn off when the paddle is placed down by the waist, and will turn back on when the paddle is raised up. This eliminates the need to continually press the On/Off button.
