

# 18" STOP/STOP LED Handheld Paddle

P/N: PA-21112

## General Description

This 18" LED paddle has a double-sided "STOP" display with bright white letters. It's perfect for efficient traffic management with the internal ball switch function for automatic on/off control. Ideal for flaggers, school crossings, event management, and general traffic control.

## Applications

- School crossings
- Parking lot management
- Work zone safety
- Event/traffic management

## Features

- Double-sided "STOP" with white LEDs
- Lightweight and durable design
- Foam grip handle and wrist strap
- Rechargeable battery with lasting power
- Best seen in low-light or nighttime conditions
- x1 On/Off button
- Includes: x1 LED Paddle, x1 Wrist Strap, x1 Battery, and x1 Charger

## Ball Switch Explained

This paddle comes equipped with a ball switch function- the LEDs will turn off when the paddle is placed down by the waist, and will turn back on when the paddle is raised up. This eliminates the need to continually press the On/Off button.

## Specifications
