General Description
Our TS-SR-45 stainless steel road stud features a durable, low maintenance design with outstanding visibility during the day and at night. The TS-SR-45 is typically used in crosswalk applications, but it also can be used to mark school zones and rail-road crossings, lane control for bridges and tunnels, wrong way warning, and toll booth or toll way lead-on applications. All In-Roadway Warning Lighting System components are available from TSC. A typical installation would include a set of road studs, a control system, one or more activation devices such as a pedestrian push button station, and flashing LED crossing signs.

Features
• Robust construction, suitable for harsh conditions.
• Snowplow resistant.
• Outstanding visibility during the day and at night.
• Suitable for applications in crosswalks, school zones, bridges and tunnels.
• Only .34" (8.7mm) above road surface.
• Connect multiple road studs in series circuit.
• Low maintenance, 100% waterproof.
• Easy replacement: base (fixed in the pavement), main body (removable).
• LEDs protected by polycarbonate window.
• Up to .62 mile (1 km) visibility distance due to high intensity LEDs.
• Optional: use different LED colors in each window.

Specifications

Modes of Operation:
• Always On (other modes of operation like flashing or sequential are available with external controller)

LED Configuration:
• Unidirectional

Electrical:

Optical:
• LED Number: 8 LEDs
• LED Type: 5mm
• LED Colors: White, Red, Yellow, Green, Blue
• Viewing Angle: 15°

Mechanical:
• Main Body: Stainless Steel League
• Base: Aluminium
• Mechanical Resistance: 120 tons
• Weight: 6.6 lb. (3 kg)
• Protection Index: IP68, IK10
• Dimensions: 6.32" (160.5mm) diameter x 3.96" (100.7mm) height

Other Versions

TS-SR-45A:
• Material: Aluminum and Polycarbonate
• Mechanical Resistance: 30 tons
• Weight: 4.4 lb. (2 kg)
• Dimensions: 6.32" (160.5mm) diameter x 3.9" (99.3mm) height
• Projection (above road surface): .29" (7.3mm)

TS-SR-45AP:
• Material: Aluminum and Polycarbonate
• Mechanical Resistance: 30 tons
• Weight: 4.4 lb. (2 kg)
• Dimensions: 6.32" (160.5mm) diameter x 3.9" (99.3mm) height
• Projection (above road surface): .29" (7.3mm)
• 4 high power LEDs (1W) for maximum brightness (day and night)
• Specially developed heat sink to increase LED lifetime.
• Viewing Angle: 16°
• Power Supply: 24V DC (200 mA max)
Installation Procedure

1. After deciding the location where the stud will be installed, drill a hole having a minimum diameter of 6.5" (165mm) and 3.94" (100mm) deep.

2. Using a disk cutter, open a connection between the holes with .59" (15mm) width and 2.36" (60mm) depth.

3. Brush any debris or dust from the hole resulting from drilling.

4. Dry the hole with a blowtorch to remove any moisture that may compromise the adhesion and effectiveness of the grout.

5. Add a SR-SFT4 installation accessory to each stud. The accessory will help to align and keep the road stud in place during the grout drying time. This accessory will be removed at the end of the installation.

6. Pour ±5.5 lb. (±2.5 kg) of ULTRAFLOW 4000/8 grout in the hole and insert the stud checking that the LEDs are facing the correct direction. Remove any excess grout.

7. The grout drying time may change depending on weather conditions. Consult the grout data sheet for more information.

   After the grout has dried, the top part of the SR-SFT4 accessory should be broken and removed.

Changing or not completing the described installation process can result in suspension of warranty.
### TS-SR-45

**Uni-directional, Stainless Steel LED Road Stud**

#### Models

<table>
<thead>
<tr>
<th>Model</th>

<tbody>
<tr>
<td>TS-SR-45</td>
<td>Hardwired Road Stud / 3mt Cable Inc. / 8 LED / Snowplow Resist. / 1 Cable Gland</td>
<td></td>
</tr>
<tr>
<td>TS-SR-45A</td>
<td>Hardwired Road Stud / 3mt Cable Inc. / 8 LED / 100% Aluminum / 1 Cable Gland</td>
<td></td>
</tr>
</tbody>
</table>

#### OBS.:  
- Cable standard (included): 0.75mm² wire section
- Different cable layouts and length should be requested upon order!

#### Cable Gland:
- TS-SR-XX(X)-X(X)-2G 2 Cable Glands

#### Color combinations:
- WR, WY, WB, WG, RY, RB, RG, YB, YG, BG

#### Standard Mode:
- Always ON.
- For flashing or sequential mode, a microcontroller is required.
